

## BMW F 650 GS special fittings and equipment

Customise your F 650 GS.

### Electronic sirens.

An electronic system to produce US special signals like Wail/Yelp as well as Peak/Horn. A warning device that is as effective as the sound signal system.

### Signal lights

You can fit your machines with flashing warning lights at the front. The flashing warning lights on the front have a beam angle of over 180° and will mean that you can always be seen. The signal lights are available with blue or red lights.

The F 650 GS can be used in as many different areas as there are optional extras, with just the right special accessories for your needs.

As well as the comprehensive fittings and accessories that come as standard with the F 650 GS, we also offer a wide range of optional extras. Suitable for a wide variety of services, you will gain a reliable "partner" to suit the requirements of your job.

### Storage pannier system

It is essential for machines in official use to have sufficient storage room available. This is why we offer the BMW Motorrad pannier system. Two volume settings mean it can be adjusted to a capacity of up to 31 litres.
